Portfolio: stanworks.dpdns.org | Location: Visakhapatnam, AP

Career Overview:

Software Engineer experienced in cross-platform applications, Android systems, Linux, and developer tooling.

Technical Skills:

- **Languages:** Dart, Java, JavaScript, Python.
- **Frameworks/Tools:** Flutter, React, Firebase, Git, Figma.
- **Core Concepts:** Data Structures, OOP, API Integration, System Design, Problem Solving.
- **Platforms:** Android, Web, Linux.
- **Systems:** AOSP, LineageOS, GNOME, Android SDK.

Projects:

[BloomOS](#) | *Android, AOSP, LineageOS, Linux, C++, Java*

- Building a privacy-focused Android operating system from source with an emphasis on security, transparency, and long-term maintainability.

[Bloom](#) (Productivity App) | *Flutter, Firebase*

- Developed a cross-platform productivity app with task management, rich text editing, and calendar integration, managing full deployment lifecycle.

[Flow Launcher](#) | *Flutter, Kotlin, Android SDK*

- Developed a custom Android launcher using Flutter with native Kotlin via Platform Channels for system-level features on Android 9+.

[AetherOS](#) | *Fedora, GNOME, Python, Bash*

- Engineered a custom Linux distribution by stripping GNOME for performance and minimalism with a Python/GTK control center for system configuration.

[Block Editor](#) | *Flutter Package*

- Built a Notion-style rich text editor from scratch with plugin architecture and multi-format export, designed for cross-platform support.

Education:

- **M.Sc.** in Computer Science, Andhra University (2024 – 2026)
- **B.Sc.** in Mathematics, Physics, and Computer Science, Gayatri Vidya Parishad (2020–2023) – **CGPA: 8.0**
